

Jonathan Mojica.

React Frontend Developer.

MERN Developer.

About Me:

I'm a Jr Frontend Developer, with a big passion for develop webApp's using React (with Next).

I'm Studying at the Instituto Tecnológico de Tijuana the degree of Computer Systems Engineering, but my curiosity pushes me to learn something else, and I learn the MERN stack.

I'm always trying to learn new technologies for both (backend and frontend) using TS.

Languages:

- English (Conversational)
- French (Basics)
- Spanish (Native)

Skills:

Work Experience:

November 2022 - Present

Jointech (Internship)

Working as frontend dev for a recruiter web site, using NextJS and Prisma, this web app is used to speed the recruiting process, can schedule an interview and connect it with google calendar.

Education:

Instituto Tecnológico de Tijuana

2019 – 2023

Computer Systems Engineering

San Diego Global Knowledge University

2022 – 2023

Full Stack Development Immersive (FSDI)

Projects:

Eat On Time

This webapp has the purpose to help restaurants with his table management, with this app the costumer can order food from the app and see the progress of the order, also can check the menu and know if some plate is available or not.

It's developed using MERN stack, you can see it working here:
