

Jonathan Mojica.

React Frontend Developer.

MERN Developer.

About Me:

Hi I'm a Jr Frontend Developer, with a big passion for develop webApp's using React.

I'm Studying at the Instituto Tecnológico de Tijuana the degree of Computer Systems Engineering, but my curiosity pushes me to learn something else, that was the point when I started to learn web development and then I jump into the MERN stack.

The most I love of web development is the frontend part, I've spent my free time to learn more about how CSS works, how some "simple" lines of CSS can transform a boring site to an amazing alive site, after that I hop into React, I never stop learning something new, because is the core of it, there's always something new to learn and to implement in the projects

Now I'm searching a place where I can use my learned skills to solve real world problems.

Skills:

- HTML5 (HTML, CSS, JS)
- React
- Typescript
- React Native
- Node JS
- Express
- MySQL
- MSSQL Server
- Git

Education:

Instituto Tecnológico de Tijuana

2019 – 2023

Computer Systems Engineering

San Diego Global Knowledge University

2022 – 2023

Full Stack Development Immersive (FSDI)

Languages:

- English (Conversational)
- French (Basics)
- Spanish (Native)

Projects:

Eat On Time (In development)

This webapp has the purpose to help restaurants with his table management, with this app the customer can order food from the app and see the progress of the order, also can check the menu and know if some plate is available or not.

It's developed using MERN stack, you can see it working here:

<https://eotapp.onrender.com>
